

PRESS RELEASE

HEALTHCARE ACTIVOS JOINS THE UNITED NATIONS GLOBAL COMPACT

Madrid, 18th September 2020

In September 2020, on the fifth anniversary of the approval of the 2030 Agenda, Healthcare Activos has officially joined the Spanish Network of the United Nations Global Compact.

Since its foundation, the company operating in the healthcare sector, has demonstrated its commitment to building a solid, socially and environmentally responsible sector that generates long-term value for all its stakeholders.

The COVID-19 crisis has evidenced that the healthcare sector is a fundamental pillar for the economic sustainability and social cohesion of every country and community.

This mission is directly connected to the United Nations strategy defined in 2015 through the 17 Sustainable Development Goals (SDA) and it is the reason why Healthcare Activos is joining the UN Global Compact.

The SDAs selected by Healthcare Activos have a transversal impact on the company's business strategy and are implemented through its environmental commitment policy, the positive social impact of its activity and its superior ethical and governance standards.

Through this initiative, Healthcare Activos aims to contribute to the leadership that companies must assume at an individual and global level to achieve a fairer and more sustainable world.

Yours sincerely,

Jorge Guarner

Executive Chairman
